

## How to: show instant pictures in a document

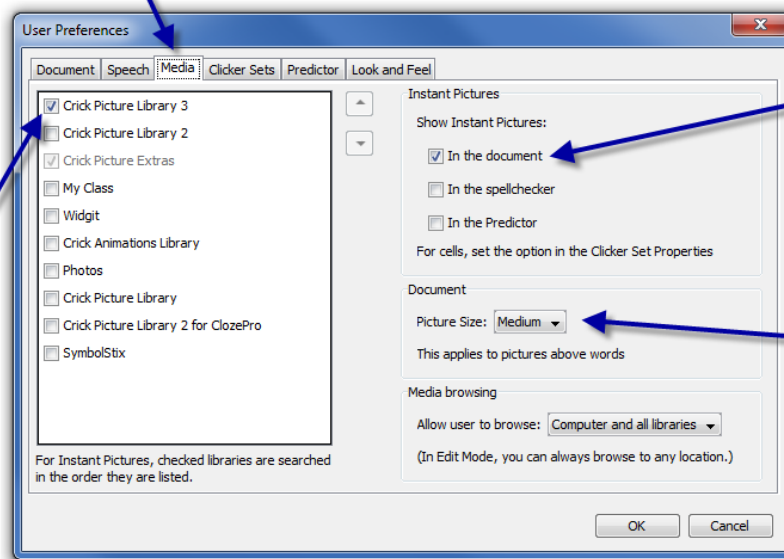

Clicker's instant pictures feature enables images to automatically appear when words are typed into the document.

Go to the **Options** menu and click **User Preferences**.

Click the **Media** tab.

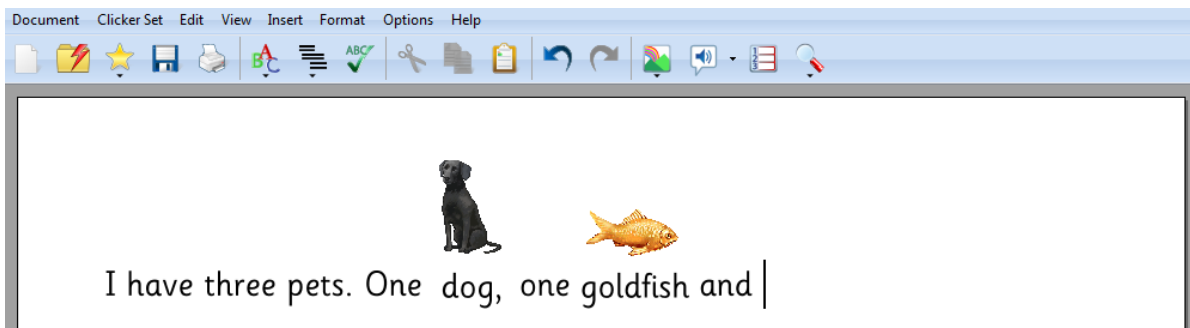

Select the libraries that you wish Clicker 6 to search for pictures and symbols in.

Choose **In the document**.

Select the size of the images when they appear in the document.

As students type, instant pictures appear above the words in the document.

Why not register your own digital pictures to use in your documents?
